

Japan's Science and Technology Community's Activities Towards the Promotion of SDGs

Kenichi TSUKAHARA, Kyushu University, Japan

Building resilience into our engineered society (mitigation).

Japan's science and technology (S&T) community continues to make great efforts towards the promotion of SDGs.

This presentation illustrates examples of the Japan's S&T community's practices that could contribute to implementation of the SDGs.

This presentation aims, to share Japan's S&T community's practices for implementing the SDGs with other national and international stakeholders, to encourage further engagement and to stimulate new partnerships and collaboration among a variety of stakeholders for creating shared value for promoting SDGs.
