

Data, AI and decision-making

Jie LU, University of Technology Sydney (UTS), NSW, Australia

WFEO

The talk will present how artificial intelligence particularly machine learning can innovatively and effectively learn from big data to support data-driven decision-making in uncertain and dynamic situations. A set of new machine learning theories, methodologies and algorithms are developed to handle ever-changing complex data stream situations. These new developments can enhance data-driven prediction, recommendation and decision support systems in big data environments.
